

Addendum #1

Instructional Technology Resources (K-12) (SY23)

Issue Date: Wednesday, November 24, 2021

Bids Due: Wednesday, December 8, 2021

1. Due to the COVID pandemic, our offices are open only at a limited capacity. Because of this, signatories are mainly working remotely. Are electronic signatures (DocuSign) acceptable?

Yes, electronic signatures from official digital signature tools are acceptable.

2.
 - a. Can you please detail what "digital components" mean to you? Are you referring to the platform itself being accessible through multiple devices?

Yes, digital resources that are compatible with both laptops and desktops as well as tablets.

- b. Can you please help us understand what you mean by "Embedded actionable strategies with instructional exemplars".

Solutions that are not locked, like questions that teachers cannot modify for their students. I would like to see content that can be adapted to student needs and has an algorithm that supports student growth. Instruction exemplars built into the solution will support asynchronous learning when students see what "success" looks like.

3. The RFP mentions the Skyward integration system and a "Project Unicorn Pledge." Do you have any documentation or information on these points?

All bids must have a data privacy pledge and Project Unicorn is a common pledge in RI. All solutions must be able to integrate with our LMS, Skyward, to export grades or any student data.
