

Addendum #1

Science Education Instructional Materials and Curricular Resources (SY23)

Issue Date: Tuesday, December 7, 2021

Bids Due: Wednesday, December 15, 2021

1. In relation to the requirements listed under Tab 4 - we are also submitting digital samples of our product.

We will review digital samples of your solution

2. We know that typically the district purchases one year at a time; however, we noticed on page 14 of the RFP under Section VII Proposal Requirements that multi-year contract pricing is listed. Can you confirm if the district is interested in reviewing multi-year pricing?

We are looking at core curriculum to be used for multiple years, not just for next year. So, yes, multi-year pricing will be reviewed.

3. Page 12 of the RFP states, "The district intends to consider and award to curricular resources that are rated on EdReports as being high-quality curriculum and are "green" in all three gateways: (1 & 2) alignment to standards with depth and quality in the content area, and (3) usability of instructional materials for teachers and students." Based on this sentence, are only vendors that are listed on the EdReports website eligible to submit a proposal?

EdReports is constantly reviewing products to update status. We will review all bids that come in and use EdReports as a guide as we make our final decision.

4. Our science curriculum is currently under review by EdReports and we will not have the final results/ratings known at the time of this RFP submission. However, we are able to submit a letter from EdReports stating that our science curriculum is under review. Will the district accept this letter from EdReports in lieu of the final EdReports ratings?

EdReports is constantly reviewing products to update status. We will review all bids that come in and use EdReports as a guide as we make our final decision.
